

I was saddened to hear that the FCC may be taking over the airwaves and giving priority to LPFM stations as opposed to the national station AIR 1. Air 1 is my favorite radio station and I use my money to support this listener-supported radio station. I'm scared as to what could come on in the place of Air 1 if this were to happen. Air 1 is a family-friendly station that is a wonderful influence on our community. We do not need more radio stations that run programs that either have a bad influence or no influence on its listeners. Please reconsider what you will be doing if this happens. Thank you for your time.
